

Rhaglen LEADER – Prosiect Peilot Asedau Cymunedol

Mae adeiladau ac asedau cymunedol yn hanfodol bwysig mewn cymunedau gwledig ar gyfer darparu gwasanaethau, cynigion hamdden, mynd i'r afael ag unigedd gwledig yn ogystal â rhoi cymorth i drigolion gwledig.

Er mwyn sicrhau bod yr asedau neu'r gwasanaethau hynny'n gynaliadwy, mae wedi dod yn fwyfwy amlwg bod angen i gymunedau allu lleihau eu costau gweinyddol a chlustnodi ffyrdd newydd o sicrhau cynaliadwyedd y gwasanaethau hyn heb ddibynnu ar wirfoddolwyr.

Rydym yn ystyried datblygu cyfres o brosiectau peilot ar draws Sir Gaerfyrddin wledig i gefnogi cynaliadwyedd asedau cymunedol gwledig.

Defnyddio technoleg ddigidol

Rydym yn bwriadu treialu'r defnydd o dechnolegau digidol i gefnogi cynaliadwyedd asedau cymunedol gwledig.

Ein syniad;

- Treialu'r defnydd o fysellbadiau clo SMART er mwyn lleihau'r amser mae'n ei gymryd i wirfoddolwyr agor a chau adeiladau i'r cyfleusterau llogi hynny
- Treialu'r defnydd o system archebu ar-lein i symleiddio'r broses archebu ar gyfer llogwyr

Archwiliadau Ynni

Mae costau rhedeg cynyddol adeiladau cymunedol yn peri risg i'w hyfywedd, felly rydym yn bwriadu treialu gwasanaeth newydd ar gyfer adeiladau cymunedol gwledig i'w helpu i ddod yn fwy cynaliadwy.

Ein syniad;

- Cynnig adroddiad archwilio ynni am ddim i adeiladau cymunedol a gynhelir gan arbenigwyr o fewn y sector
- Hyd at £500 i weithredu newidiadau effeithlonrwydd ynni a amlygir yn yr adroddiad
- Cymorth i ymchwilio i gymorth ariannol pellach i weithredu prosiectau effeithlonrwydd ynni mwy o faint

Cyllido torfol

Mae cyfyngiadau COVID yn golygu bod cyfleoedd codi arian traddodiadol yn fwyfwy anodd.

Ein syniad;

- Creu llwyfan digidol er mwyn codi ymwybyddiaeth o brosiectau cymunedol gwledig er mwyn annog rhoddion ar-lein drwy lwyfannau cyllido torfol.

LEADER programme – Community Asset Pilot Project

Community buildings and assets are of vital importance in rural communities for service delivery, leisure offerings, tackling rural isolation as well as providing support to rural residents.

To ensure the sustainability of those assets or services, it has become increasingly clear that communities need to be able to reduce their administrative costs and identify new ways of ensuring the sustainability of these services without relying on volunteers.

We are looking at developing a suite of projects that we wish to pilot across rural Carmarthenshire to support the sustainability of rural community assets.

Using digital technology

We are looking to pilot the use of digital technologies to support the sustainability of rural community assets.

Our idea;

- Piloting the use of SMART lock keypads in order to reduce volunteer time in opening and closing buildings to those hiring facilities
- Piloting the use of an online booking system to streamline the booking process for hirers.

Examples of similar projects across Wales

Energy Audits

Rising running costs for community buildings cause a risk to their viability, therefore we are looking to pilot a new service for rural community buildings to support them in becoming more sustainable.

Our idea;

- Offer community building a free energy audit report carried out by specialists within the sector (limited offer for up to 6 buildings across rural Carmarthenshire)
- Up to £500 to implement energy efficiency changes highlighted in the report
- Support to explore further financial support to implement larger energy efficient projects

Examples of similar projects across Wales

Crowdfunding

COVID restrictions are making traditional fundraising opportunities increasingly difficult.

Our idea;

- Creation of a digital platform in order to raise awareness of rural community projects in order to encourage online donations via crowdfunding platforms.

Examples of similar projects across Wales
